CollegePadho.com

Apr. 2022 - May 2022

website where users can explore different colleges and potentially apply for admissions directly through the platform. It seems to serve as a comprehensive portal for individuals seeking information about various colleges, allowing them to make informed decisions about their education and potentially facilitating the application process. Users can likely browse through different colleges, access detailed information about courses, admission requirements, and other relevant details, making it a convenient one-stop platform for prospective students.

**Technology Used:** CSS, MaterialUI, JavaScript, ReactJS, JSX, ReactJSHooks, Axios

TheVibzz.com

Sept. 2023 - Current

Thevibzz.com is a website where users can buy clothes, it likely serves as an online clothing store. Users can browse through a variety of clothing items, select their desired products, and make purchases online. Such websites typically offer a range of clothing options for men, women allowing customers to explore different styles, sizes, and fashion trends from the comfort of their homes. For specific details about the products and services offered on this website.

**Technology Used:** CSS, MaterialUI, JavaScript, NextJS,

DirectAdmission

Sept. 2022 - Sept. 2022

DirectAdmission is a localized website catering specifically to residents of Noida, where individuals can explore colleges within the Noida area and potentially apply for admissions directly through the platform. This localized approach allows users to focus specifically on educational institutions within Noida, making it a convenient and tailored resource for prospective students in that region. Users can likely browse through different colleges in Noida, access detailed information about courses, admission requirements, and other relevant details, making it a specialized platform for individuals seeking education options within Noida.

**Technology Used:** CSS, MaterialUI, JavaScript, ReactJS, JSX, ReactJSHooks, Axios

MyTutorRoom

Oct. 2023 - Oct. 2023

MyTutorRoom appears to be an online platform that offers educational support and tutoring services to students. The website likely provides a range of services, including assistance with homework and access to online tutoring classes. Students can receive help with their homework from qualified tutors, enabling them to understand and complete their assignments effectively. Additionally, the platform connects students with expert teachers for online tuition classes, allowing for personalized learning experiences and academic support in various subjects.

**Technology Used:** CSS, MaterialUI, JavaScript, ReactJS, JSX, ReactJSHooks

ColorGame

Oct. 2023 - Current

ColorGame is an online gaming platform where users can participate by paying a fee of rupees 1. Players are likely given the opportunity to predict specific aspects of the game, such as a number, color, and size, with the chance to win a monetary amount if their predictions are correct. This concept suggests a game of chance or prediction, where users can engage in a simple yet potentially rewarding activity by making accurate guesses based on the specified criteria.

**Technology Used:** CSS, MaterialUI, JavaScript, ReactJS, JSX, ReactJSHooks, Socket.io
